

HYDRAULIC GROUP

DL DKL011

Hydraulic group designed to perform as an autonomous and portable unit for the supply of hydraulic power.

The aim of this item is to grant autonomy to other didactic equipment included in Fluid Mechanics lab in order to have also the possibility to perform simultaneously different experiments without depending on the main hydraulic bench.

MAIN FEATURES

- Easy operation.
- Storage tank with cap to prevent the inlet of impurities into the water.
- Overflow chamber to avoid air inlet into the circuit.
- Pressure outlets for pump performance tests.

TECHNICAL DATA

Tank:

- Material: Polypropylene
- Capacity: 45 liters
- Accessories: made of PVC

Pump features:

- Maximum manometric head: 23 T.M.H.
- Volume 20 / 160 l/min
- H 21 / 10 T.M.H.
- H max: 23 T.M.H.
- H min: 10 T.M.H.
- Power consumption: 750W (1HP)
- Max power: 950W
- Motor speed: 2.900 rpm

Dimensions:

700 x 430 x 460 mm
