

DL HYGEN

HYDROGEN GENERATOR

In order to produce hydrogen everywhere.

PEM Electrolyzer

- Maximum requested power: 55 W

- Supply current: 110-230V / 50-60Hz

Zero maintenance. The maximum reliability, ease of use. The pressure of hydrogen release is adjustable up to 10.6 bar according to the ideal parameters for hydrogen to refill the cartridges of every type of metal hydrides. The ultra-pure hydrogen gas to maximize the efficiency and life of the cartridges in metal hydrides.

Technical features:

Production rate:	100 cc/min.
Purity H2:	5.0 (99.999%)
Weight:	17 kg.
Dimensions:	23 x 48 x 35 cm.
Pressure H2:	0 – 10.6 bar

It includes a connection kit for connecting to the hydrogen storage canister.
