

### Network Technology Training Package DL NTP001

This package focuses on the practical aspects of setting up and looking after a network of between two and fifty personal computers.

It provides a broad knowledge base sufficient to plan, implement, use, manage, and maintain small networks typical of those found in homes and small to medium-sized businesses.

Activities are provided for the student to practice the skills required to make and test network cabling and to investigate and research various network scenarios.

It is complete with all the following items:

- Structured Cabling Trainer, to allow the students to install and test industry standard cabling.
- UTP Cable
- IDC Punchdown Tool
- 6.5 mm Slotted Screwdriver
- Cable Tester
- Data Cable Stripper
- Digital Multimeter
- RJ45 CrimpTool
- Self Healing Cutting Mat
- Network Technology Consumables Pack
